

COVID-19 trajectory for Saint Lucia

Briefing created by staff of the George Alleyne Chronic Disease Research Centre and the Public Health Group of The Faculty of Medical Sciences, Cave Hill Campus, The University of the West Indies. *Group Contacts: Ian Hambleton (analytics), Maddy Murphy (public health interventions), Kim Quimby (logistics planning), Natasha Sobers (surveillance).* For all our COVID-19 surveillance outputs, go to www.ianhambleton.com/covid19

Updated on: 7 Feb 2023 at 16:51:25

Aim of this briefing. We present the number of confirmed cases and deaths ¹ from COVID-19 infection in Saint Lucia since the start of the outbreak, which we measure as the number of days since the first confirmed case. We report whether the case rate (per 100,000 people) is currently increasing or decreasing, and describe the current Saint Lucia case load compared to the Saint Lucia outbreak peak. For more on case rates, download the associated *country profile* For Saint Lucia.

Confirmed Events	Total	New (7 days)	Case Rate
Cases	29,803	0	0% of peak
Deaths	409	0	Rate rising

These graphs show the absolute numbers of cases and deaths in Saint Lucia since the start of the outbreak. They are the core information for assessing the extent of the COVID-19 burden over time.

Graph. New cases per week in Saint Lucia as of 7 Feb 2023

Graph. New deaths per week in Saint Lucia as of 7 Feb 2023
